

## A NOTE FROM DR ORREY

*Micky never charged for repeat prescriptions.*

Not because she didn't want to. Because the admin was a nightmare.

So she sat down with her son Simon and he built her a system. Her secretaries tested it. Micky gave feedback at every step.

Three years of testing later, it works. Now she wants you to have it too.

**First month on us.** No lock-in. Walk away in thirty days if it hasn't changed how your practice runs.

— *Micky*

If you are interested and would like more information, please reach out to Simon:

## PRICING

### One flat monthly fee.

No revenue sharing. No per-script cuts.

Repeat Script

R999 /mo

**Most doctors charge R150–R299 per prescription.** At that rate, you could recover the monthly fee in a single day.

**Your previous day's earnings land in your account every morning.**

Automatically. A summary email tells you exactly what came in.

A gateway fee of R15 per transaction covers payment processing. That goes to the processor, not to us.

*First month free. No lock-in.*

## REPEAT SCRIPT

# Designed *to make* you money.

For doctors who are tired of losing revenue to admin.

*We had this same problem.  
So we built the solution.*

From the rooms of Dr Ilsa (Micky) Orrey  
Constantiaberg Medi-Clinic

## The Problem

Repeat prescriptions are simple.  
The process around them is not.

Which doctor are you?

### 1 You don't charge for prescriptions

Not because the work has no value. Because the admin isn't worth it.

### 2 You issue before the patient pays

Payment becomes an afterthought. You end up chasing.

### 3 You ask for payment first

Your staff sends invoices, waits for proof, checks the bank. Unnecessary admin for everyone.

*It all works.*

*It is just an admin **nightmare**.*

## The Solution

*We built a system that gets out of your way.*

- The patient submits their prescription request online.
- They enter their card details before you see anything.
- You review and issue the prescription on your own time.
- You decide whether to charge.
- **The script goes out automatically.**

*That's it.*

Completely web-based. No software to install. Works with any practice, anywhere.

### Less admin.

No invoices. No EFT checks. No chasing.

### More control.

You review every request. You decide whether to charge.

### The money lands in your account.

Every morning. Before your first patient.

## Your Outcome

### ✓ Less admin.

Prescription requests come through one system. Structured, complete, no back and forth. Your receptionist stops fielding calls.

### ✓ Less stress.

You review and issue on your own time. Nothing chases you. No outstanding payments sitting in the back of your mind.

### ✓ More money.

Payment is collected before you issue the script. The money is in your account the next morning.

### BONUS

*You don't have to deal with medical aids anymore.*

You do not submit claims.  
You do not wait months for reimbursement.

**You have already been paid.**
